

HOW TO INSTALL THE MOVIE SEARCH APP

1. Unzip the installer

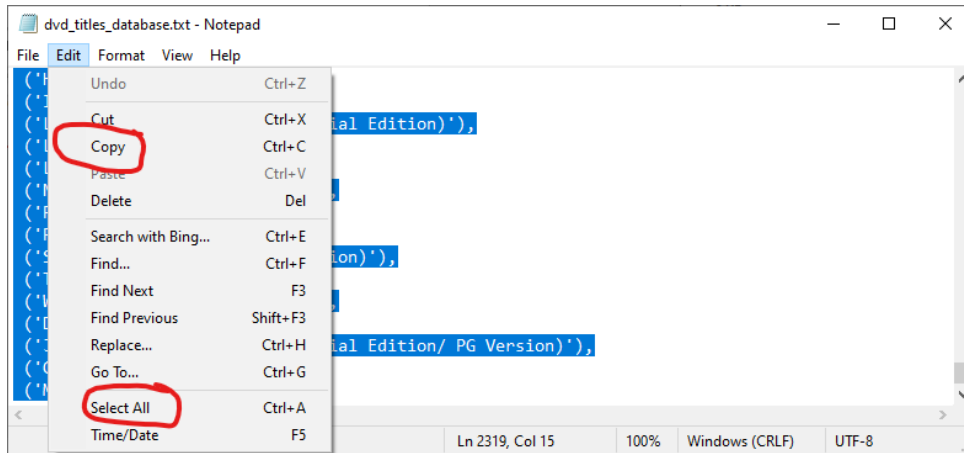

2. Open the unzipped folder with the install.bat and other files inside.

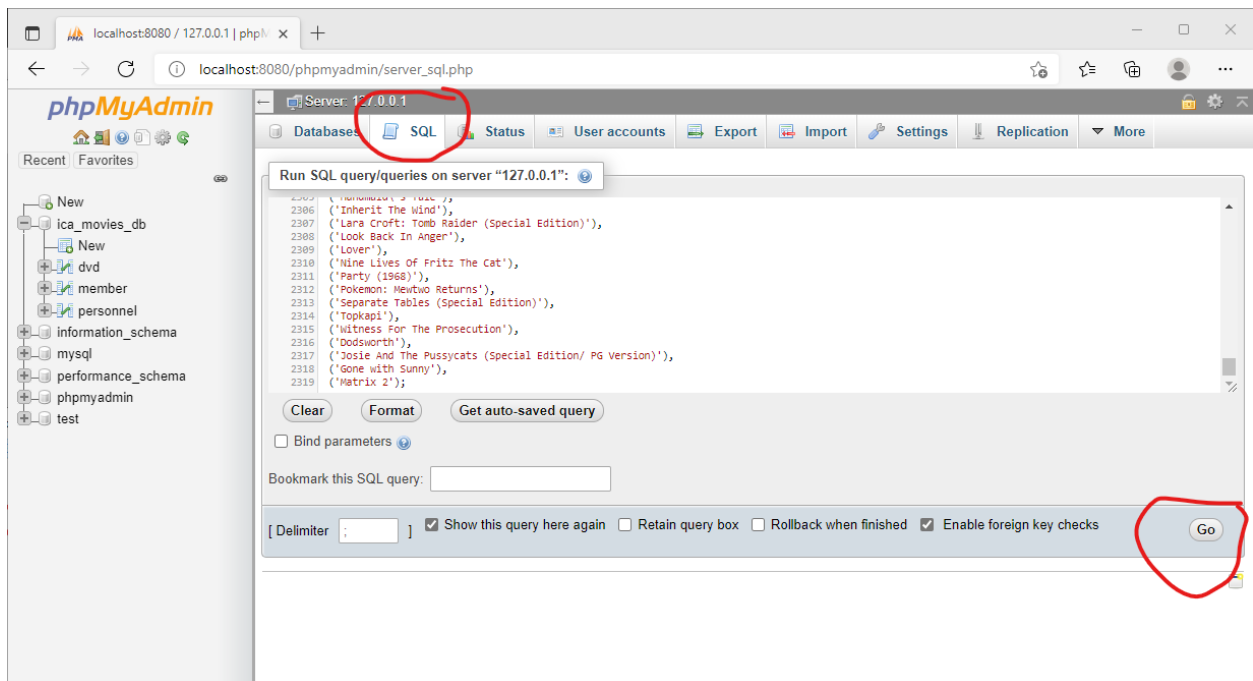

Loading the database

3. Open the database file dvd_titles_database.txt, Select All, and Copy.

4. Run the copied database commands in the SQL server. In phpMyAdmin, this is done by Clicking SQL, and pasting the copied database commands using Ctrl-V, then clicking Go

This result shows that it worked, despite the error message:

The screenshot shows the phpMyAdmin web interface in a browser window. The address bar indicates the URL is `localhost:8080/phpmyadmin/server_sql.php`. The interface includes a sidebar with a database tree on the left and a main panel on the right for SQL queries and results.

The database tree on the left shows the following structure:

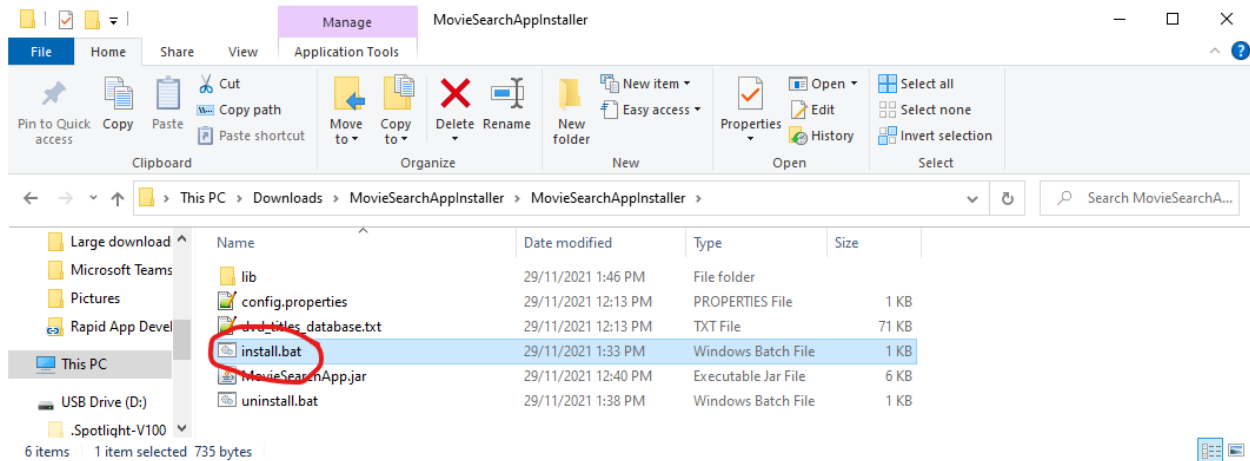

- New
 - ica_movies_db
 - New
 - dvd
 - member
 - personnel
 - information_schema
 - mysql
 - performance_schema
 - phpmyadmin
 - test

The main panel displays the results of SQL queries. The first query, `CREATE DATABASE IF NOT EXISTS `dvd_titles` DEFAULT CHARACTER SET utf8 COLLATE utf8_general_ci`, returned an empty result set. The second query, `CREATE TABLE IF NOT EXISTS `dvd_titles`.`movies` (`ID` int(4) AUTO_INCREMENT PRIMARY KEY, `Title` varchar(82)) DEFAULT CHARACTER SET utf8 COLLATE utf8_general_ci`, also returned an empty result set. The third query, `INSERT INTO `dvd_titles`.`movies` (`Title`) VALUES ('10'), ('12 Monkeys (DTS)'), ('12 Monkeys: Collector's Edition'), ('187: Special Edition'), ('1941: Collector's Edition'), ('200 Cigarettes'), ('2001: A Space Odyssey (Original Release)'), ('2001: A Space Odyssey (Repackaged Version)'), ('2010: The year We Made Contact'), ('3 Days Of The Condor'), ('48 HRS.'), ('8 Seconds'), ('9 1/2 Weeks'), ('Above The Law'), ('Absolute Power'), ('Ace Ventura: Pet Detective'), ('Ace Ventura: When Nature Calls'), ('Action Jackson'), ('Action Pack Gift Set'), ('Adam Sandler Collection'), ('Adam's Rib'), ('Addams Family'), ('Addams Family Values'), ('Addicted to Love'), ('Adventures Of Pinocchio'), ('Adventures Of Priscilla, Queen Of The Desert (MGM/UA)'), ('Adventures Of Sebastian Cole'), ('Affliction'), ('Al Pacino Collection'), ('Alanis Morissette: Jagged Little Pill, Live'), ('Alfred Hitchcock Collection (Box Se[...])`, resulted in 2298 rows being inserted.

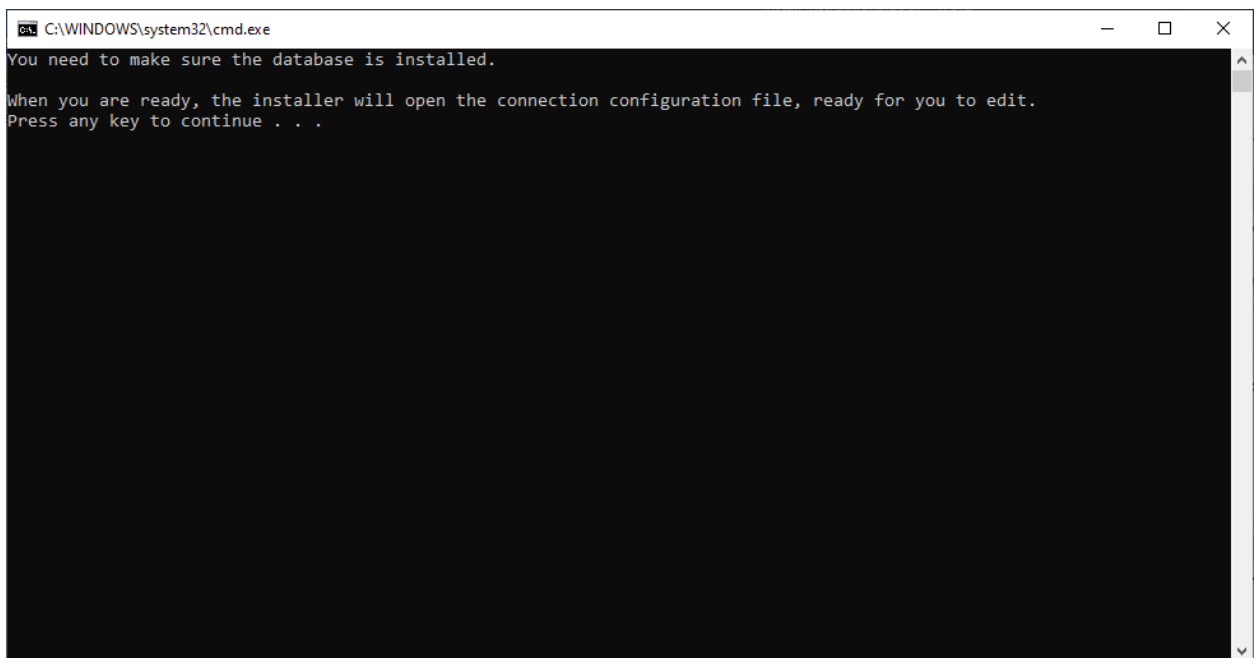

An error message, `Error: #1046 No database selected`, is displayed in a yellow box and is circled in red. The error message is located between the first and second query results.

Running the install script

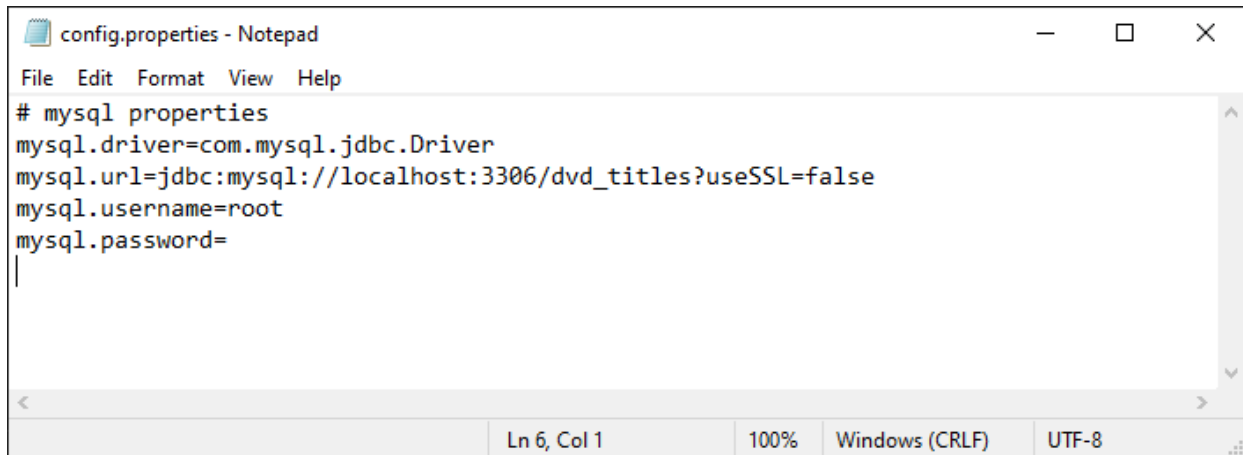

5. Run the install.bat file inside the MovieSearchAppInstaller folder.

6. The installer will remind you the database needs to be installed, which has just been done. Press a key when asked.

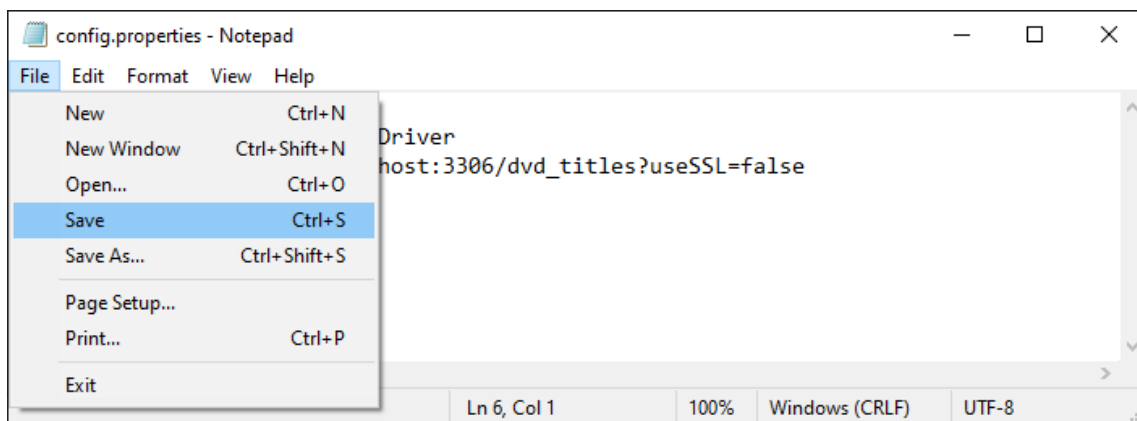

7. Edit the connection configuration file to match your database server, and save the file, then close it:

A screenshot of a Notepad window titled "config.properties - Notepad". The menu bar includes File, Edit, Format, View, and Help. The text area contains the following configuration for MySQL:

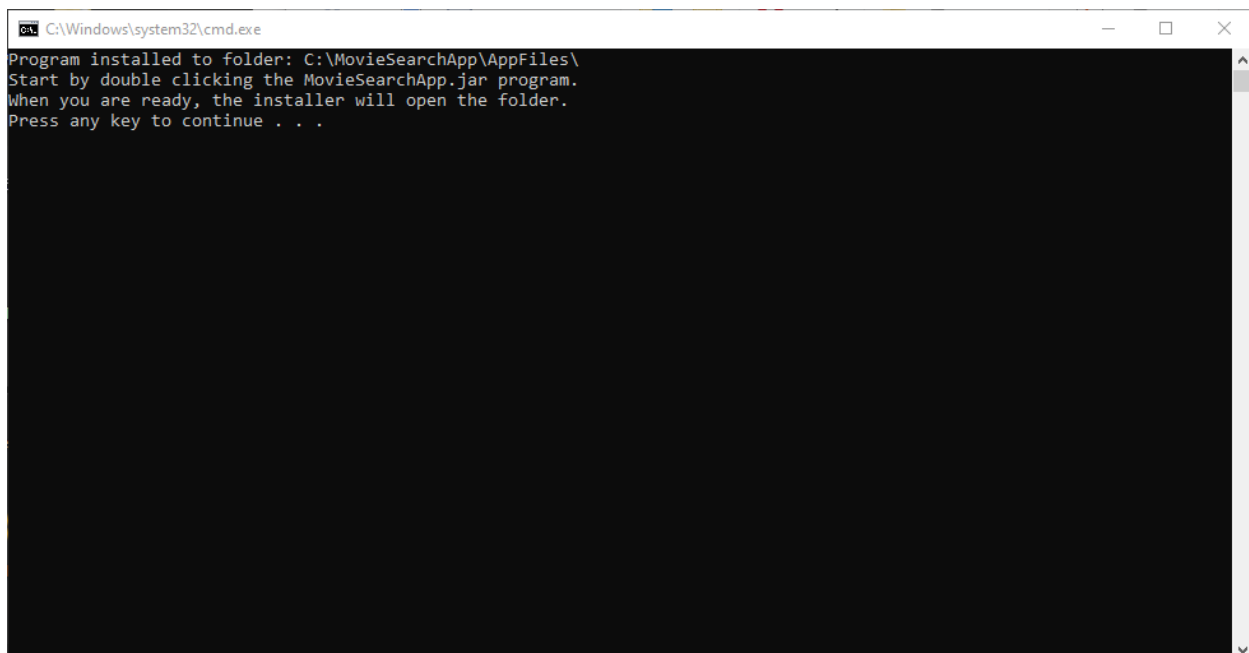

```
# mysql properties
mysql.driver=com.mysql.jdbc.Driver
mysql.url=jdbc:mysql://localhost:3306/dvd_titles?useSSL=false
mysql.username=root
mysql.password=
```

The status bar at the bottom indicates "Ln 6, Col 1", "100%", "Windows (CRLF)", and "UTF-8".

A screenshot of the same Notepad window, but with the "File" menu open. The "Save" option, which has the keyboard shortcut "Ctrl+S", is highlighted in blue. Other visible options include New, New Window, Open..., Save As..., Page Setup..., Print..., and Exit. The text area content is partially visible behind the menu.

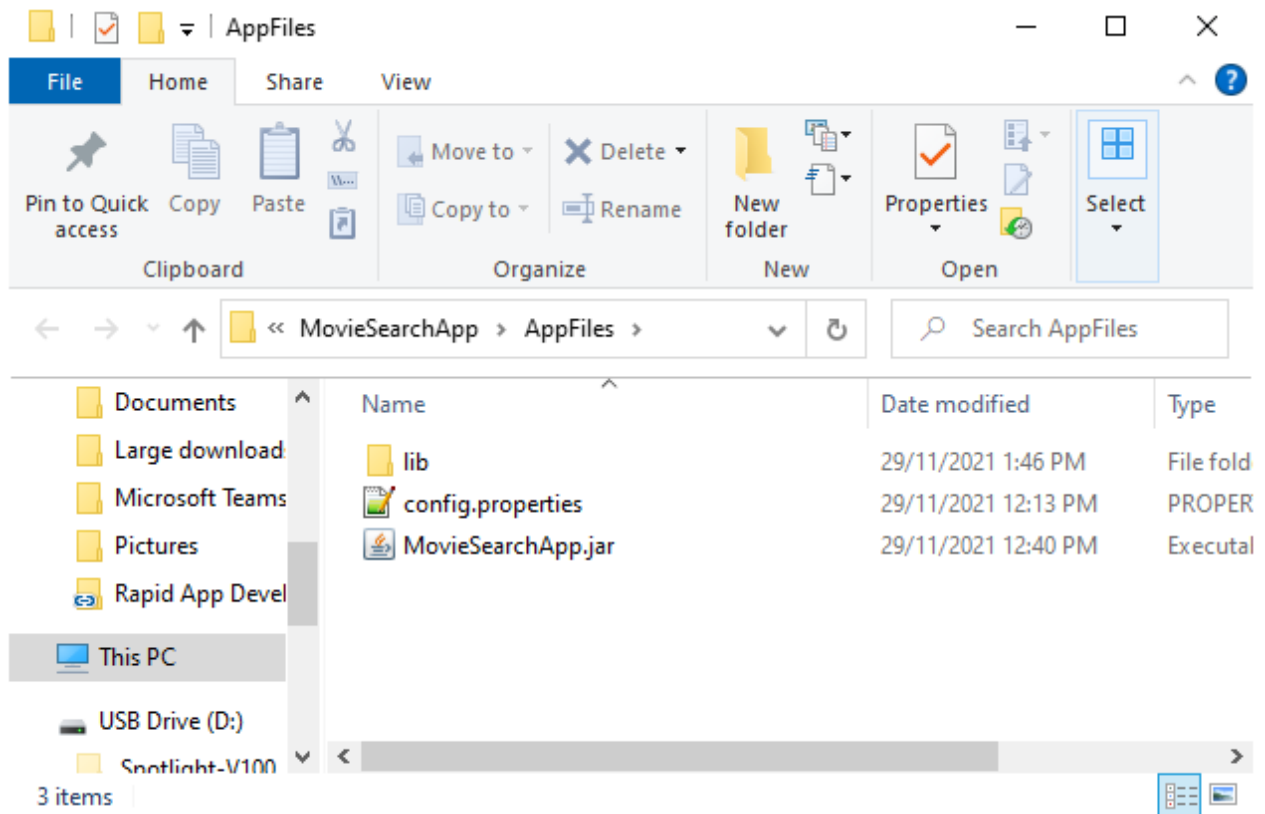

Then the program is ready to open the folder:

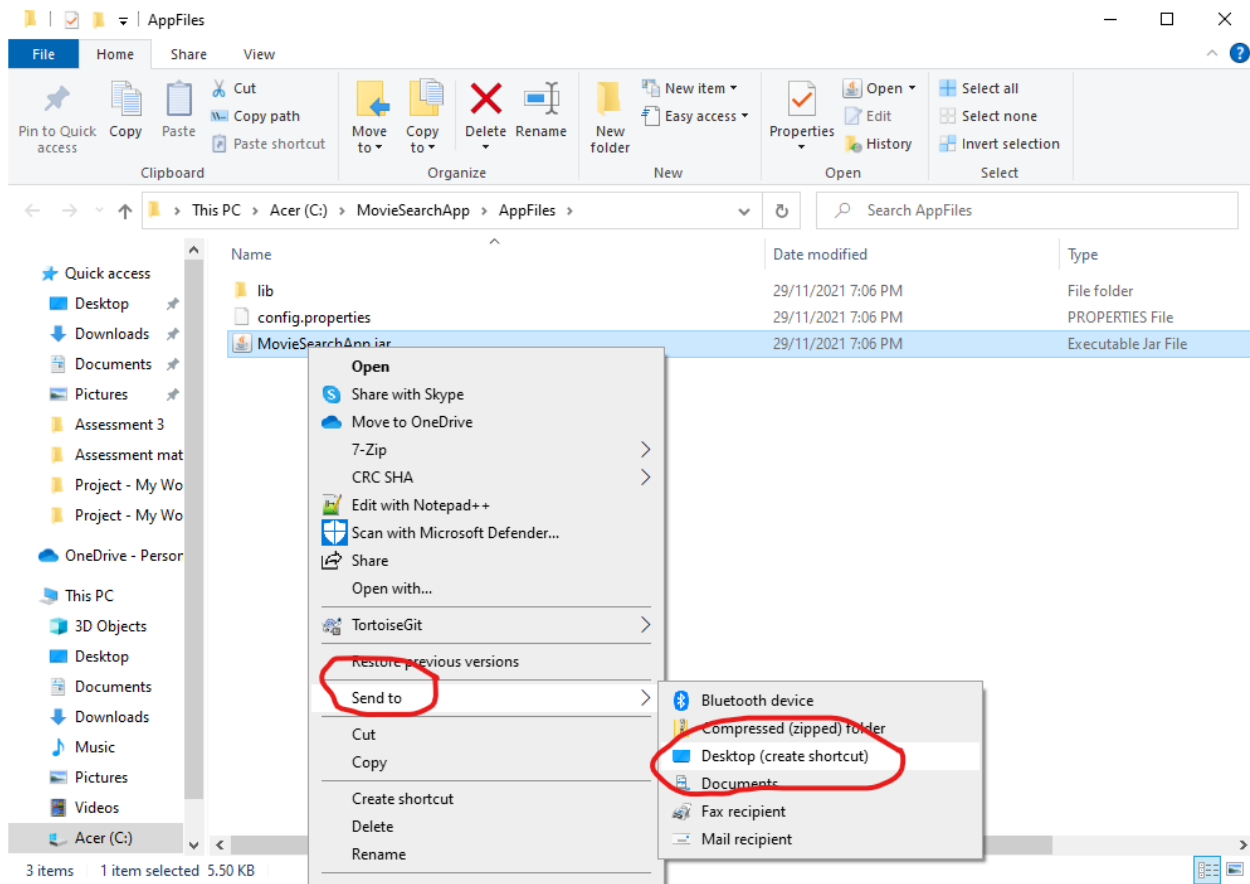

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The text inside the window provides instructions for running the program:

```
Program installed to folder: C:\MovieSearchApp\AppFiles\
Start by double clicking the MovieSearchApp.jar program.
When you are ready, the installer will open the folder.
Press any key to continue . . .
```

8. Press a key, and the program folder appears:

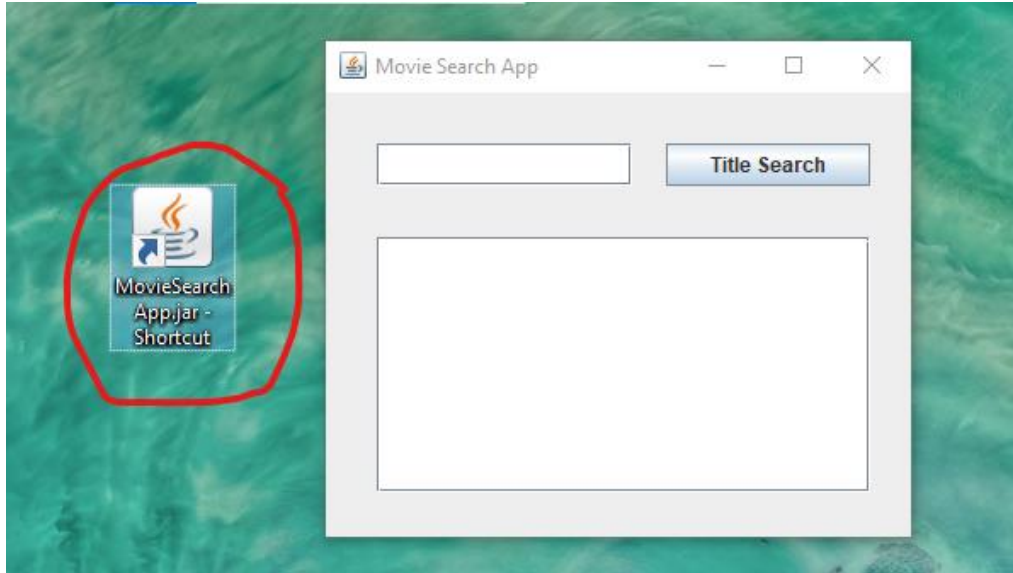

9. If you want a desktop shortcut, right click on MovieSearchApp.jar and select Send to / Desktop (create shortcut)

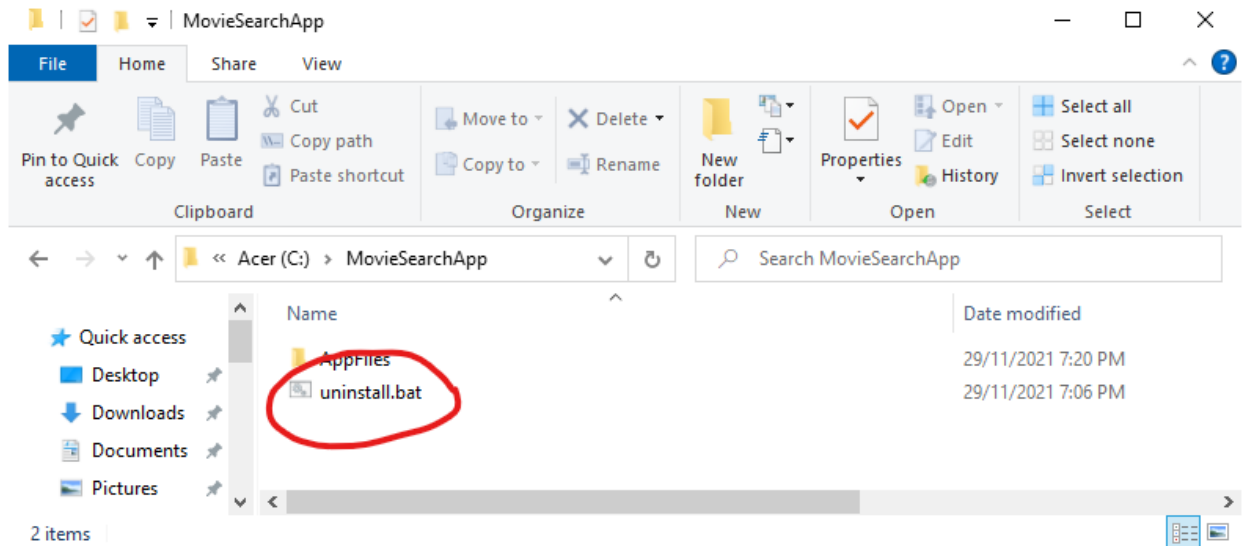

Installation complete

Now the installation is complete. To start the program, double click MovieSearchApp.jar to start the program, or the MovieSearchApp.jar Shortcut link on the desktop if you made the shortcut.

UNINSTALLING

To uninstall the program, run the uninstall.bat file inside C:\MovieSearchApp

It will delete the program:
